**Title** : Automating the Cisco  
Enterprise Cloud

**Version** : DEMO

1. Cisco Intelligent Automation Cloud is a solution that enables organizations to automate delivery of physical and virtual servers through the use of a self-service portal. Which two key Cisco products are used for the automation framework of this solution? (Choose two.)

- A. Cisco Process Orchestrator
- B. Cisco Prime Service Catalog
- C. Cisco Cloud Orchestrator
- D. Cisco Server Orchestrator
- E. Cisco Process Portal

**Answer:** A, B

2. Which three statements are true regarding Cisco VACS and its benefit for cloud deployment? (Choose three.)

- A. Cisco VACS offers easy-to-use templates for rapid provisioning.
- B. Cisco VACS lacks security although it offers intuitive user interface through Cisco UCS Director.
- C. Cisco VACS is a robust container for three-tier or custom application deployment.
- D. CSR benefits up to 10-G/ps throughput with the advent of Cisco VACS support.
- E. CSR benefits up to 40-G/ps throughput with the advent of Cisco VACS support.
- F. Cisco VACS offers a custom application deployment for the Cisco Prime Service Catalog.

**Answer:** A, C, D

3. The Cisco UCS Director includes a set of wizards that guide through configuring features. Which three wizards are available in the Cisco UCS Director? (Choose three.)

- A. FlexPod Configuration
- B. VDC Creation
- C. Catalog Configuration
- D. Device Discovery
- E. Zoning Creation
- F. Storage Discovery

**Answer:** A, B, D

4. A cost model in UCS Director is used to define the unit level costs of which two virtual resources? (Choose two.)

- A. socket
- B. CPU
- C. RAM
- D. NIC
- E. vNIC
- F. datastore size

**Answer:** B, C

5. Which two statements are true regarding role-based access control in Prime Service Catalog? (Choose two.)

- A. IT admin uses the Cisco Prime Service Catalog as the primary interface to manage tenant life cycle and services.

- B. Tenant admin in the private cloud is associated with tenant billing and cost model.
- C. Development of stack designer for application deployment is not within the framework of RBAC.
- D. IT admin manages infrastructure in the cloud and uses the Cisco Prime Service Catalog, Horizon, and Openstack templates as the primary interface.

**Answer:** A, D
