**Title** : IBM SPSS Statistics Level 1 v2

Version : DEMO

1.What statistical test should be used to assess whether the percentage differences observed in a crosstabs table could have occurred by chance?

A. Correlation

B. Linear Regression

C. T-Test

D. Chi-square test of independence

Answer: D

2.The text file shown in the figure below is an example of a fixed format text file.

A. True

B. False

Answer: B

3.In the Variable View, if you have a series of variables that share the same category coding scheme, you can enter value labels for one variable, then copy these labels to the other variables.

A. True

B. False

Answer: A

4.For a variable salary we have the statistics as shown in the figure below.

Descriptive Statistics

	N	Minimum	Maximum	Mean
Current Salary	474	-9999.00	135000.00	33916.7321
Valid N (listwise)	474			

The reported Mean is incorrect because a value, -9999, is included in its calculation. How can this situation be fixed?

A. Define -9999 as a system-missing value.

B. Remove all cases with the value -9999 for the variable salary from the data file.

C. Define -9999 as a user-missing value.

D. Define -9999 as both a system- and user-missing value.

Answer: C

5.Which statement is true about this box plot?

A. The mean is 14.

B. The standard deviation is 14 (20 minus 6).

C. The standard deviation is4 (16 minus 12).

D. of the outliers are on the lower end of the distribution.

Answer: D
