- A. 4852
- B. 4961
- C. 4840
- D. 4846

Answer: A

Explanation: The newest models of the SurePOS 500 family, the 4852-526 and 4852-566, have recently been introduced.

5.What are two eco-friendly selling points of the SurePOS 500?

- A. recycled plastic
- B. fanless operation
- C. more efficient power supply

D. recycling trade-in discount after seven years

Answer: A,D

Explanation: Eco-friendly

Upgradable — Keyboards are designed with modular building blocks to enable reuse of parts in future installations. The design enables an extended product life to perform over a long (seven-year) life cycle, translating into fewer obsolete products and less disposal.

Reuse — New keyboards are compatible with recent IBM POS systems. The modular design makes it easy to repair worn components, and easy to upgrade as technology changes.

Minimize environmental impact — Keyboard packaging consists mostly of recycled post-consumer waste materials. Most of the keyboard and packaging content may be recycled.
