**Exam** : **UiPath-ADAv1**

**Title** : UiPath Automation  
Developer Associate v1  
Exam

**Version** : DEMO

- 1.A. At indication time, the Strict Selector has the following functionalities available:  
B. Open in UiExplorer, Copy to clipboard, Show all matches.  
C. Refresh, Open in UiExplorer, Copy to clipboard.  
D. Accuracy, Open in UiExplorer, Copy to clipboard, Show all matches.  
E. Ignore text, Copy to clipboard, Show all matches.

**Answer: C**

**Explanation:**

The Strict Selector option allows you to fine-tune the selector by adjusting the accuracy level and showing all the matches in the UI Explorer. The other options are not available at indication time.

2.A developer has created a string array variable as shown below:

```
UserNames = {"Jane", "Jack", "Jill", "John"}
```

Which expression should the developer use in a Log Message activity to print the elements of the array separated by the string ", " ?

- A. String.Join(UserNames, ",")
- B. String.Join(", ", UserNames)
- C. String.Concat(UserNames, ",")
- D. String.Concat(", ", UserNames)

**Answer: B**

**Explanation:**

The String.Join method takes two parameters: a separator and an array of strings. It returns a new string that concatenates the elements of the array using the separator. The correct syntax is String.Join(separator, array). Therefore, option B is the correct answer.

3.What is the default URL of the OCR server that runs the Computer Vision service?

- A. <https://server.uipath.com/>
- B. <https://cvserver.uipath.com/>
- C. <https://cv.uipath.com/>
- D. <https://computervision.uipath.com/>

**Answer: C**

**Explanation:**

The default URL of the OCR server that runs the Computer Vision service is <https://cv.uipath.com/>. This is the endpoint of the UiPath Computer Vision Cloud service, which provides OCR capabilities for document understanding and UI automation<sup>1</sup>.

The other options are not valid URLs for the OCR server.

4. What advantages do pre-built connectors in UiPath Integration Service offer?

- A. Reducing the need for UI and API automation, allowing developers to work exclusively with connectors.
- B. Simplified integration with popular applications, faster deployment, and integration across all UiPath Platform product solutions.
- C. Providing a fully customizable catalog of connectors for developing proprietary applications.
- D. Replacing all types of authorization and authentication protocols with a single, standardized method.

**Answer: B**

**Explanation:**

Pre-built connectors in UiPath Integration Service offer the advantage of simplifying the integration process for any automation that uses common applications such as Salesforce, Slack, Microsoft Office 365, SAP®, ServiceNow, and Google G Suite<sup>1</sup>. They also enable faster deployment and integration across all product solutions within the UiPath Platform<sup>2</sup>.

5. Which LINQ method is used to filter data in a List or Data Table based on a condition?

- A. OrderBy
- B. Where
- C. GroupBy
- D. Select

**Answer: B**

**Explanation:**

The Where method is used to filter data in a List or Data Table based on a condition. It returns a new collection that contains only the elements that satisfy the condition<sup>12</sup>. The other methods are used for different purposes: OrderBy for sorting, GroupBy for grouping, and Select for projecting<sup>3</sup>.
