Title : Administration of Veritas
Backup Exec 20.1

Version : DEMO

1.Refer to the exhibit.

The screenshot shows the Backup Exec Settings window with the 'Catalog' tab selected. The 'Truncate catalogs after' setting is set to 2 months and is highlighted with a red box. Other settings include 'Request all media in the sequence for catalog operations' and 'Use storage-based catalogs'. The catalog path is 'C:\Program Files\Veritas\Backup Exec\Catalogs'. A blue information box provides a warning about changing the catalog location.

Backup Exec catalogs each backup job.

What is the effect if the catalogs are truncated in the Backup Exec server's settings?

- A. restores fail
- B. only backup set information is listed in the restore wizard
- C. no backup set information is listed in the restore wizard
- D. restores are only performed from disk devices

Answer: A
